**Editing regulations / (peer-review protocol) – Instructions for authors**

Balneo and PRM Research Journal provides a platform for authors to publish their articles as peer-reviewed original papers, systematic reviews, meta-analyses, short communications and letters to the editor in the following fields: Balneology, Physical and Rehabilitation Medicine (PRM), Healthy Ageing, Climatology and Hydrothermotherapy.

We consider as general rules those included in the document: Uniform Requirements for Manuscripts Submitted to Biomedical Journals: Writing and Editing for Biomedical Publication - updated February 2006 by International Committee of Medical Journal Editors, which can be found on the journal web page: http://bioclima.ro/Journal.htm.

The manuscripts will be submitted via the online submission system at http://bioclima.ro/ojs or by email as an attachment in Word format to articleonbrj@bioclima.ro.

For submitting articles for Balneo Research Journal, authors must use the following template: Balneo Template

The manuscripts must be accompanied by Published Conflict-of-Interest Statement (see Form), Published Statement of Informed Consent (see Form), and Published Statement of Human and Animal Rights (see Form), signed by the main author, in the name of all authors, scanned and attached to the email.

The transfer of copyright is a standard practice in journal publishing, designed to facilitate the protection from copyright abuse for authors, editors, and publishers. Each manuscript submitted to the Balneo Research Journal must be accompanied by a statement that the material represents original work, has not been previously published, and has not been submitted simultaneously for publication elsewhere: (Assignment of copyright and authorship responsibilities).

The language of papers is English.

After manuscript receipt, the corresponding author will receive a short e-mail confirming the receipt which will contain the registration number, the date the manuscript was received and the fact that the manuscript was send for peer-review. The Journal Peer-review Board Secretary chooses aleatory 2 peer-reviewers (from the Peer-review Board) and sends them by e-mail the manuscript.

The reviewer’s decision (approval with no changes, approval with major/minor changes, rejection), taken on the responsibility of the peer-reviewers, will be immediately communicated by e-mail to the corresponding author by the editor.
If the manuscript gets approval with changes, the corresponding author shall send the improved manuscript within 4 weeks. The editor will convey the corresponding author's answer to the peer reviewers. If they are satisfied with the corresponding author's answer, they will send the executive editor the decision of approval for publication of the improved manuscript.

If the peer reviewers consider that the corresponding author did not meet/or met poorly the revision requests, they will deny the approval for publication, which will be communicated to the editor. The approval for publication once taken by the reviewers, the decision will be communicated in the editorial meeting.

The author who has the quality of editor-in-chief or editor does not participate in any way in the decision-making process of selection and publication of the respective article.

**Peer-review process**
- All the journal’s content should be subjected to peer-review.
- Peer-review is defined as obtaining advice on individual manuscripts from reviewers’ expert in the field.

Procedures for dealing with unethical behaviour

Identification of unethical behaviour

- Misconduct and unethical behaviour may be identified and brought to the attention of the editor and publisher at any time, by anyone.
- Misconduct and unethical behaviour may include, but need not be limited to, examples as outlined above.
- Whoever informs the editor or publisher of such conduct should provide sufficient information and evidence in order for an investigation to be initiated. All allegations should be taken seriously and treated in the same way, until a successful decision or conclusion is reached.

Investigation

- An initial decision should be taken by the editor, who should consult with or seek advice from the publisher, if appropriate.
- Evidence should be gathered, while avoiding spreading any allegations beyond those who need to know.

Minor breaches

- Minor misconduct might be dealt with without the need to consult more widely. In any event, the author should be given the opportunity to respond to any allegations.

Serious breaches

- Serious misconduct might require that the employers of the accused be notified. The editor, in consultation with the publisher or Society as appropriate, should make the decision whether or not to involve the employers, either by examining the available evidence themselves or by further consultation with a limited number of experts.

Outcomes (in increasing order of severity; may be applied separately or in conjunction)

- Informing or educating the author or reviewer where there appears to be a misunderstanding or misapplication of acceptable standards.
- A more strongly worded letter to the author or reviewer covering the misconduct and as a warning to future behaviour.
- Publication of a formal notice detailing the misconduct.
- Publication of an editorial detailing the misconduct.
- A formal letter to the head of the author’s or reviewer’s department or funding agency.
- Formal retraction or withdrawal of a publication from the journal, in conjunction with informing the head of the author or reviewer’s department, Abstracting & Indexing services and the readership of the publication.
- Imposition of a formal embargo on contributions from an individual for a defined period.
- Reporting the case and outcome to a professional organisation or higher authority for further investigation and action.
